Work Experience

Testbook.com - Frontend Developer (Feb 2021 to Present)

- Collaborate with design team to develop features for the teaching tool that faculties use to conduct live sessions.
- Mentor a team of 4 junior developers and make sure the code submitted is up to standards through code reviews.
- Hold discussions with faculties in order to understand their pain points and come up with scalable solutions.
- Work with content team to resolve issues in the learning management system to ensure smooth user experience.

Mutterfly.in - Tech Lead (Jan 2018 to Sept 2020)

Managed a team of 3 developers to deliver many features for the company website and the internal team dashboard on tight deadlines to enhance customer experience.

Website

- Reduced load time of the website by 75% to achieve a score of 92 on google page speed insights and made it compatible with all modern browsers.
- Collaborated with the digital marketing team to integrate optimized SEO metrics in order to boost visibility on all social platforms.
- Integrated 3rd party services such as payment platforms and content delivery networks
- Built a subscription flow that enabled customers to rent products for longer duration thereby increasing profits.
- Collaborated with the UI/UX team to revamp the product details page entirely in order to increase customer engagement by 25% and conversion rate by 12%.

Delivery App

- Owned end to end development of the app used by delivery partners
- Hold interviews to Delivery partners to understand pain points and prioritise features around those.

Internal Dashboard

- Worked with the operations team to add features which helped automate processes such as order tracking and invoicing on the internal team dashboard.
- Scaled tech infrastructure in order to allow for expansion in a new city.

Projects

- Built a USP for the popular UPI payments app, PhonePe.
- A feature idea for food delivery apps in order to boost average ticket size.
- Developed a movie and Tv series browser web application by consuming TMDB API
- Designed a restaurant reservation application including its user flows and app wireframes.
- Created aesthetic landing pages for mock nature trails and real estate websites.
